

## **Do you have Primary Progressive Multiple Sclerosis?**

Researchers at the Montreal Neurological Institute Clinical Research Unit are recruiting patients for a clinical research study on an experimental oral study medication for the treatment of Primary Progressive Multiple Sclerosis.

If your MS symptoms have persisted between 2 and 10 years and you are between the age of 25 and 65 you could be eligible for this clinical study. As a participant, you will receive study-related medical evaluations, investigational medication and study-related lab tests at no charge.

The recruitment period is from now until approximately June 2011.

This clinical study is being conducted by Dr. Jack Antel at the Montreal Neurological Institute and Hospital. If you are interested or wish to obtain additional information, please contact:
