2020-2021 Annual Research Competition- Funding decision

POSTDOCTORAL FELLOWSHIPS

The MS Society of Canada is pleased to announce the funding decisions for the applications submitted to the 2020-2021 Annual Research Competition. The value of each approved Postdoctoral Fellowship award is \$41,000 for PhD and \$50,500 for MD for one year.

In total, **12 Postdoctoral Fellowship** have been awarded as follows (listed in alphabetical order):

Postdoctoral Fellowships			
First Name	Last Name	Institution	Project Title
Gauruv	Bose	University of Ottawa	Stratification of patients with multiple sclerosis: indicators of disease severity, rationale for treatment choice, and clinical, radiologic, and patient-centered outcome measures
Yifei	Dong	The University of Calgary	Identification and mitigation of oxidized phosphatidylcholine as a novel mediator of neurodegeneration in multiple sclerosis
Jean-David	Gothié	McGill University	Mitochondrial function in myelination and remyelination
Jonas	Graf	Heinrich Heine Universität, Klinik für Neurologie	Infection risk and the disease-modifying drugs for multiple sclerosis: an observational study
Adil	Harroud	University of California San Francisco	The genetic basis of progression in multiple sclerosis
Chloé	Hoornaert	Centre de Recherche du Centre Hospitalier de l'Université de Montréal	The therapeutic potential of the Th2 cytokine interleukin-13 in multiple sclerosis
Priya	Jhelum	The Research Institute of the McGill University Health Centre	The role of ferroptosis in chronic-EAE
Huah Shin	Ng	The University of British Columbia	Disease-modifying Drug Safety and Effectiveness in Multiple Sclerosis [DRUMS]
Kyla	McKay	Karolinska Institutet	The causes and consequences of paediatric multiple sclerosis: A population-based study
Khalil	Rawji	The University of Cambridge, Department of Clinical Neurosciences	Astrocytic Factors That Impair Remyelination in the Ageing Central Nervous System

To be a leader in finding a cure for multiple sclerosis and enabling people affected by MS to enhance their quality of life.

Founding member of the Multiple Sclerosis Society International Foundation

Hanane	Touil	Columbia University	Single cell RNA-Seq characterization of an IFN+ Human Microglia in Multiple Sclerosis
Stephanie	Zandee	Centre de Recherche du Centre Hospitalier de l'Université de Montréal	Unraveling regulatory T cell migration across the blood brain barrier to develop new therapies for multiple sclerosis
